

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1-361 (Cancelled).

362. (Currently Amended) A mascara, an eyeliner, a foundation, a lipstick, a blusher, a make-up-removing product, a make-up product for the body, an eyeshadow, a face powder, a concealer product, a nail composition, a shampoo, a conditioner, or an anti-sun product comprising a composition comprising at least one liquid fatty phase in said mascara, eyeliner, foundation, blusher, lipstick, make-up-removing product, make-up product for the body, eyeshadow, face powder, concealer product, nail composition, shampoo, conditioner, or antisun product which comprises:

(i) at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymer and ethylenediamine/stearyl dimer tallate copolymer; and

(ii) at least one oil-soluble cationic surfactant.

363. (Currently Amended) A cosmetic composition comprising:

at least one liquid fatty phase in said cosmetic composition which comprises:

(i) at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymer and ethylenediamine/stearyl dimer tallate copolymer; and

(ii) at least one oil-soluble cationic surfactant.

364. (Currently Amended) A cosmetic composition comprising:

(i) at least one liquid fatty phase structured with at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymer and ethylenediamine/stearyl dimer tallate copolymer;

(ii) at least one oil-soluble cationic surfactant; and

(iii) at least one coloring agent.

365. (Currently Amended) A method comprising applying a cosmetic composition to a keratin material, said cosmetic composition comprising:

at least one liquid fatty phase which comprises:

(i) at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymer and ethylenediamine/stearyl dimer tallate copolymer; and

(ii) at least one oil-soluble cationic surfactant.

366. (Currently Amended) A method for making a cosmetic composition in the form of a physiologically acceptable composition comprising including-in said composition

at least one liquid fatty phase which comprises:

(i) at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymer and ethylenediamine/stearyl dimer tallate copolymer; and

(ii) at least one oil-soluble cationic surfactant.

367. (Currently Amended) A method for providing at least one of resistance to shear and stability to a cosmetic composition, comprising including in said cosmetic composition at least one liquid fatty phase which comprises:

(i) at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymer and ethylenediamine/stearyl dimer tallate copolymer; and

(ii) at least one oil-soluble cationic surfactant,

and further wherein said at least one structuring polymer and said at least one oil-soluble cationic surfactant are present in a combined amount effective to provide at least one property chosen from resistance to shear and stability.

368. (Currently Amended) A cosmetic composition comprising:

(i) at least one liquid fatty phase in said cosmetic composition structured with at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymer and ethylenediamine/stearyl dimer tallate copolymer; and

(ii) at least one oil-soluble cationic surfactant.
